KATE PRASOLEK

skills

home skills portfolio contact

Hello,

I am a card designer with a genuine love and passion for crafting beautiful layouts and usable products that people love and always come back for more. I have strong customer service background, experience in using Photoshop and inDesign and I am a self student of frontend development. My natural attention to detail allows me to achieve a clear, organised perfection.

programms / technologies

- Photoshop
- inDesign
- HTML5
- CSS3
- Javascript and jQuery
- Bootstrap
- Github

soft skills

- ability to teamwork
- strong sense of responsibility
- open mind and creativity
- ease with interpersonal contacts
- time management
- flexibility
- commitment

Trivia

I design cards from 15 years.
I prefer a cup of tea instead of coffee.
I love composition and typography.
I am a gamer and I like to play team games.
I love to observe the world and absorb inspirations from it.
I learn how to create digital stamps to stop buying someone's else designs and now I help others.
I prefer to make handmade gifts rather than buy ones.
I experienced a traditional Indian wedding and it was amazing!
I did not speak English when I came to the UK. I do now! :)

logo design

I create the very first logo for myself to give a new, shiny look to my card fanpage - arteKatie.
Now I am more than happy to help others get more professional.

print design

Need is the mother or invention, isn't it?

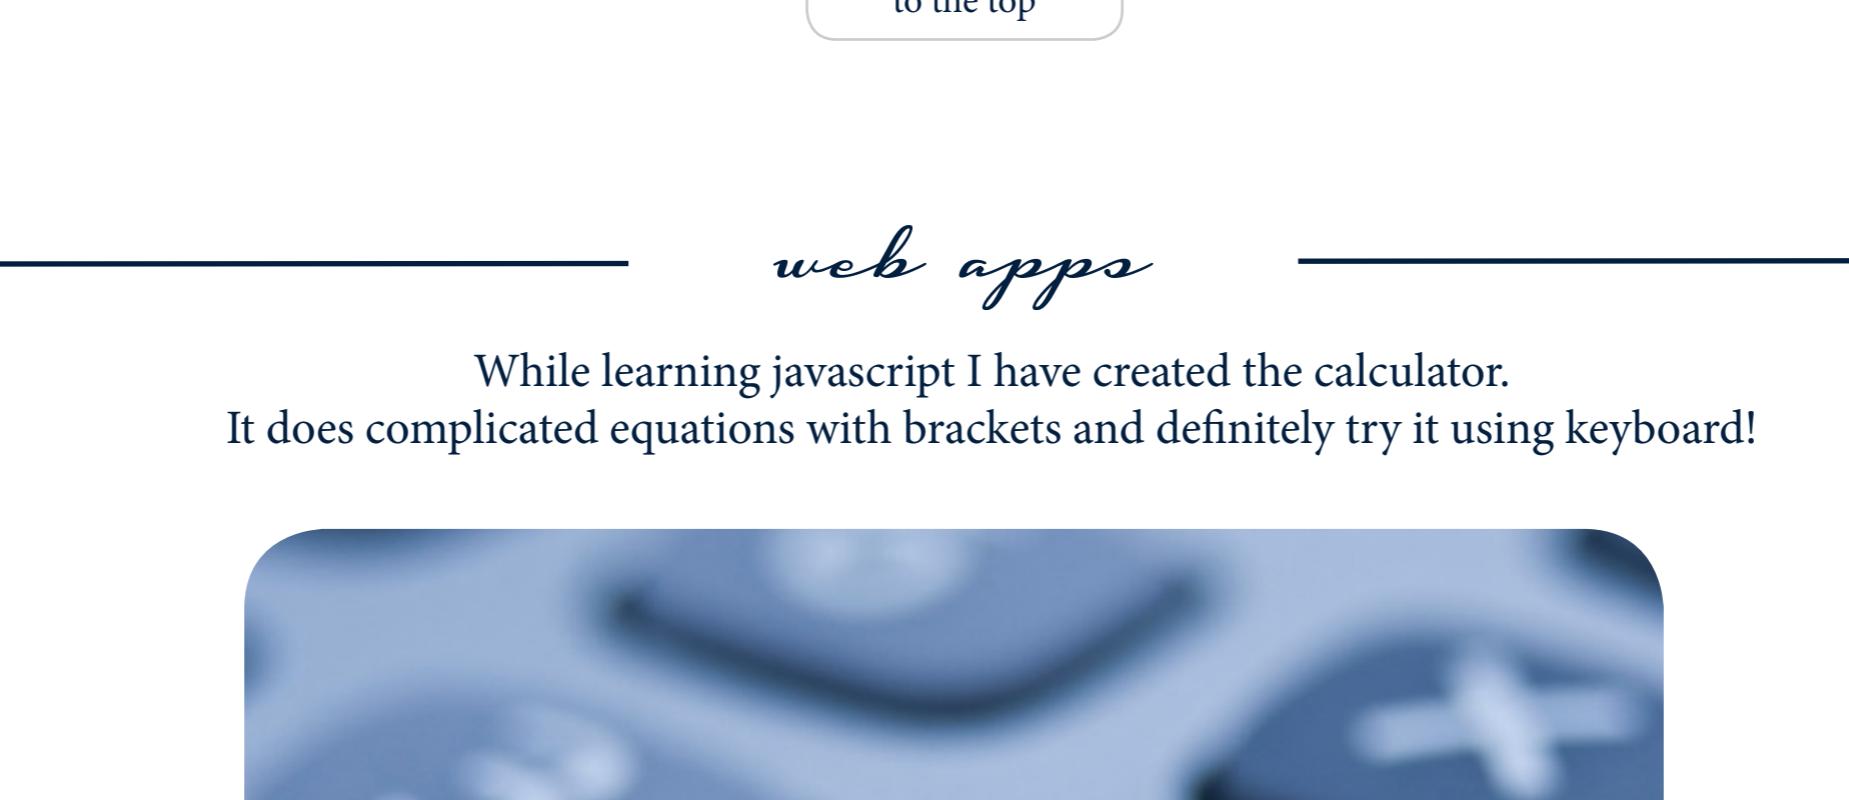

I designed my daily planner and because I keep records of my meals and it was annoying to have notes written everywhere I decided to design a template I can print and use every day.

I use this idea to create also a recipe pages for a handmade cooking book.

I create a digital images to print them and give a nice, personalised touch to my cards.

I create them for others too.

digital design

I design backgrounds, contest's info and diploma for my facebook craft group too, flyers and posters for my card fanpage use.

[to the top](#)

web apps

While learning javascript I have created the calculator.
It does complicated equations with brackets and definitely try it using keyboard!
